REVOLUTIONARY DEVELOPMENT FOR CRYPTOCURRENCIES TRADING

Revolutionary crypto trading development

FasTrader is the most advanced development with artificial intelligence that analyzes the opportunities in the cryptocurrency trade - an easy-to-use bot that helps people to obtain small profits around 1 to 2% per transaction. By performing several operations per day, you will be able to realize the great advantages and benefits.
 FasTrader monitors the exchanges with higher Volume Binance, Bittrex, Hitbtc and many others, carries out the technical and fundamental analysis to find investment opportunities. Then, when the users receives the information, they can safely analyze and devote a minimum of their time to perform the transaction. Once the trade starts, you must

 FasTrader allows everyone, regardless of their business experience, to start benefiting from the world market for cryptocurrencies.

personally analyze the time of departure. Both artificial intelligence with human decision makes the trader's decision easier.

We are the first robot integrating external signals based on artificial intelligence.

Artificial intelligence makes the technical analysis of first quality, using each indicator perfectly. Working 24 hours to identify increasing crytocoins.

Once they have detected a promising investment, they will send a buy signal directly to our app or destination point. Check the performance reports to choose each entry according to your investment balances.

We recommend selling your coins in the short term, to maximize your profits. Our strategy is based on entries that occur after a big fall that give rebounds around 2%, then you can sell and you can recover your capital more profits for continue obtaining large profits permanently, as long as our system tells you and continually build a larger and more positive circuit every day.

Fastrader has been designed such as a revolutionary development to help small traders to have a wide profit in any market context.

- On the other hand, thanks to the artificial intelligence used in the creation of our powerful development, you can physically analyze a possible closing of the transaction with a higher percentage of profits. This allows you to surf the bull trend and never sell soon in bull rush market.

- As our powerful development is completely based on the cloud, we will have a constant improvement, you can also enjoy new functions instantly without the hassle of installing updates.

- You will receive many signals with highly profitable business opportunities throughout the day or at the hours you schedule according to your needs and available hours, therefore, this will give you multiple possibilities to generate profits

COMPARISON BOTS WITH FASTRADER

Since 2017

OTHER AUTOMATIC BOTS

From the cryptocurrencies trading beginning, it has been somewhat chaotic for some investors with little experience. The crypto market has grown too fast, open 24/7 and with a high volatility in its prices. To become successful with the crypto trade, it is necessary to have the maximum information available, but when traders make the analyzes manually, they usually do not have time to analyze all the information and the best buy signals are lost.

* Some platforms have designed robots, in a basic way to trade in an automated way through the exchange API. Created with good intention, but failing in several concepts. Falling into the manipulation of some tokens, making movements that possibly the investor had not done, resulting in large losses.

* Given the large number of cryptocurrencies that are listed daily,

* Some platforms have designed bots, in a basic way to trade in an automated way through the exchange API. Created with good intention, but failing in several concepts. Falling into the manipulation of some tokens, making movements that possibly the investor had not done, resulting in large losses.

the traditional automatic bots do not have the ability to know which will be the correct movements, creating transactions that traders believe that they are positives, but without having all the data become substantial losses.

FASTRADER BENEFITS

* FasTrader uses advanced algorithmic trading indicators and Artificial Intelligence to search for opportunities.

* The trader is the one who decides whether to perform the transaction analyzed by our powerful bots or not. Running less risk in buying coins with little potential, low volume or with a possible FUD that will not help you to reach the desired Profit.

* FasTrader will have as a strong point a blocker to avoid the signals of projects with low volume in a certain period of hours, there will be a coin recognition with FUD and it will automatically avoid these signals.

*FasTrader has a huge number of important sources that connected to the A.I., we can predict certain movements in the cryptocurrency market.
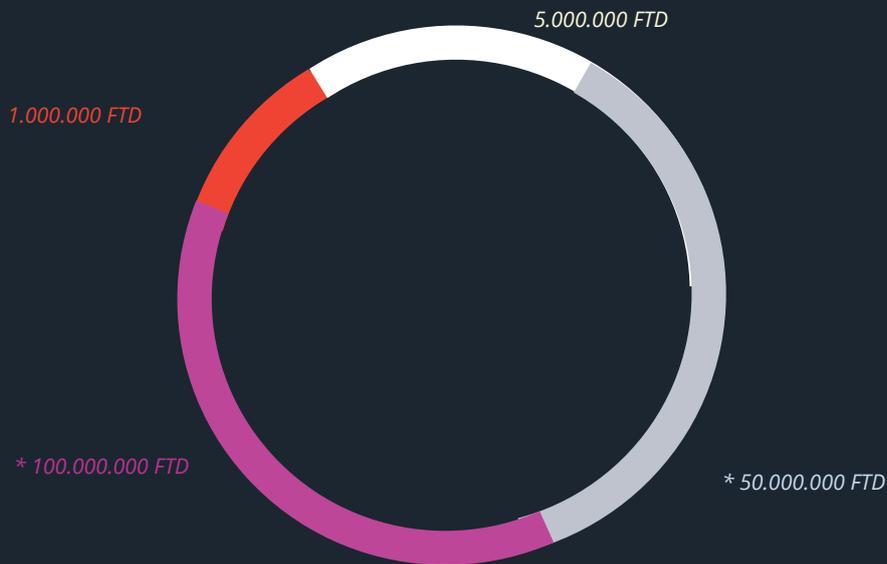

BENEFITS FOR HOLDERS

FasTrader is an ERC-20 token, so it is intended to be used by the members of the FasTrader platform. 50% of the tokens that we receive as part of the memberships will be burned, thus decreasing the supply.

The membership price is still to be determined, but will be between $ 50 to $ 300 depending on the desired membership, and we will only receive FTD as payment. (The amount of FTD to be paid will be determined by the market, according to the token price.)

BENEFITS FOR HOLDERS

5.000.000 FTD

1.000.000 FTD

* 100.000.000 FTD

* 50.000.000 FTD

HOLDERS FTD

| QTY TOKENS FTD		DAYS HODL	Bonus considering the number of days.
1.000.000		30	5
5.000.000		30	15
*50.000.000		120	**free monty
*100.000.000		120	**free monty more Testnet

* minimum amount to hold for a minimum of 120 days. If you withdraw them before reaching 120 days, the offer will not be validated

** Free membership is valid as long as you do not remove the tokens from the wallet

The entire holders membership system will be controlled prior to a registration in our platform, where the wallet will have to be placed, once the FTD Tokens are located so that our bot begins the days of counting.

• Important notice: We will never request you to deposit the FTD on any wallet. The owner will always have them on your wallet to be the hold and we will register them in our platform.

ROADMAP

Q4 2017

Rearching assets, monitoring the crypto market for more than 4300 hours. Studying all markets movements day and nigth, non stop. Analyze with wisdom the corrections and rebounds in the market.

Q1 2018

Mount the computerized system in Cloud Start of development.

Q2 2018

Start of sale of tokens, Private Sale

Q3 2018

The sale of tokens is finished. Launch Tokens in exchanges. 1º Airdrop for the community

Q4 2018

Beta Version (internal) and big houders FTD, including all the technological and new developments avoiding mistakes minimizing risks. Create all the improvements.

Q1 2019

Release 1º FasTrader version BETA internal available for users selected -new tools and strategies will be added

Q2 2019

Launch of FasTrader Mobile version (IOS/Android) Beta Release new Roadmap.

TEAM

HUGO BOLSTER
CEO & Co-founder

Born in Brazil, Technological entrepreneur with 7 years of experience in launching companies in Western Europe and United States, specialized in big data, artificial intelligence and robotization. After graduating from Yale University, I started designing IT products and schematized investment portfolios. I have worked in J.P. Morgan Chase for more than 2 years as Manager Director in big data, later Bank of America hired my skills for developing algorithms for trading derivatives, finally I have addressed my experience building Fastrader.

DIM MARSHY
CTO & Co-founder

Director of IT companies in development outsourcing, industrial, and financial analytics. Basically Fastrader is the most advanced robot designed for the crypto market industry, we turn into human intelligence in solutions for medium and small investors around the world. This is a very important development for the new era in this new ecosystem, allowing to enhance my private experience in the best International Banks of the world. We selected the best talent in Western Europe basically in France, Belgium and Holland. An active member of Paris ultimate technology and creative artificial intelligence. We have decided to include a small stake of private capital as a way to return to the investment community everything we have received in years.

YOUNG KIM
Director of Engineering

Before joining Fastrader, Young spent 9 years at Nasdaq, where she proceeded up to Senior Manager position, overseeing up to 7 engineering teams. Young holds Master in Computer Science from Columbia, she has helped launch multiple companies, patents and innovations. She likes building IT companies for emerging technologies in security, banks, mobile, and internet.

JERRY WALLY
Advisor

Jerry Wally is a top market researcher and founder of several companies specialized in high speed trading, he worked in Bank Boston for more than 14 years where he has built incredible results. A veteran of Wall Street, he started his amazing work in Silicon Valley, he has helped launch multiple innovations in the financial market industry with derivatives. He likes building creative systems based on the new blockchain technology. Wally is frequently called the king of fast trading.

ANA HARTINOV
Advisor

Fastrader's advisor expert in algorithmic trading, she has an enormous experience in Wall Street. Expert on big data technologies, real-time data, and artificial intelligence computer science. She founded Global Trader A.H Ltd., an investment company with assets and portfolio companies in the USA, Asia and Europe. Prior to that, worked for Bank of America and Morgan Stanley. Holds an MBA degree from Yale Business School and degree in Mathematics of Katholieke Universiteit Leuven from Belgium.

POUNG OKAMA
Analyst and Trader

Analyst and Trader with over 4 years of experience in listed futures, derivatives, Forex and Cryptos. Blockchain researcher and investor since start of 2017. At Fastrader, Linda is responsible for maintaining a portfolio using all her experience and Artificial Intelligence. She is permanently creating new strategies for the one of the most profitable trading team, and working with experts around the world for designing strategies
